### **Identatronics Search and Rescue Software and Evolis Dualys Printer assist Minneapolis Police in I-35W Bridge Collapse**

Bloomington, MN – Ban-Koe Companies provided an immediate solution to the Minneapolis Police Department to aid in securing the area surrounding the collapse of the I-35W bridge on August 1, 2007.

Ban-Koe proposed the solution consisting of Identatronics SRV-id® Search and Rescue identification software with an Evolis Dualys dual-sided card printer. A driver's license scanner captures detailed information about each volunteer, including a photograph and saves the information to a secure database. A finger print scanner and signature pad are also used to further secure the credentials of each volunteer. The software tracks the start and the end of the volunteer's effort to ensure their safe return. The cards are printed to an Evolis Dualys printer and are worn by each volunteer involved in the search. Ban-Koe was able to deliver and install the system on-site within 48 hours.

Identatronics Incorporated is located in Elk Grove Village, Illinois and manufactures badges and software for a variety of applications. Evolis, manufacturer of advanced technology printers is located at 29, Avenue de la Fontaine, Z.I. Angers-Beaucouze, 49070 Beaucouze, France.
