

Visitor Management for Schools

VIDIX ID visitor Management System

Your schools are exposed to many new and different faces every day. Teachers and regular staff are easily identified, but what about those unfamiliar faces? Who are they, why are they here, and do they belong here? Aside from the locks on your doors, visitor management is your primary line of defense in keeping your students and faculty safe.

The VIDIX ID visitor software package provides a comprehensive visitor management program for the unique needs of K-12 institutions. ID visitor instantly creates a visitor ID badge for students, substitute teachers, and other building visitors. In addition, all relevant information about them is captured in a secure database file, including their photo (optional), the name of the person being visited, the reason for the visit, and the time of the meeting. In thirty seconds or less, the visitor is professionally checked in and a high quality visitor badge is automatically printed.

With a VIDIX visitor identification system you'll always know who belongs and who doesn't.

VIDIX ID visitor Benefits

- Easy to identify possible intruders without a badge.
- Scans visitor information in seconds and saves it for future visits.
- Logs who visitors are there to see and why.
- Identifies those visitors requiring escorts.
- Record parent visits
- Issue highly visible badges for hall passes
- Issue substitute teacher badges
- Takes picture of visitor or ID that is presented.
- Features include visitor's picture on badge, scannable barcodes, and time-sensitive badges.
- Customize badges with your school or district logo.
- Records the time visitors enter and leave.
